

Our Clean Vision for a Net Zero Carbon Future

We are a leader in setting net zero carbon goals in our operations and value chain by 2050

We have a history of not only setting but accelerating leading climate goals

We support our customers in adopting more efficient, cleaner equipment in their homes and businesses

The Scope 3 shareholder proposal asks us to set a net zero goal for our customers' usage.

We have limited influence in household and business customer

- heating demand
- cooking needs
- equipment efficiency

DTE Electric Net Zero Commitment

Adding thousands of megawatts of wind and solar power

Retiring coal-fired power plants

Accelerating voluntary renewables program, one of the largest in the nation

DTE Electric Net Zero Carbon Reduction Goals

DTE Gas Net Zero Commitment

Supplier net zero by 2050

DTE Gas will require its suppliers to operate at net zero greenhouse gas emissions by 2050

Support industry-wide movement toward cleaner natural gas production

DTE Gas operational net zero by 2050

Main renewal program and infrastructure modernization

Will invest in a combination of renewable natural gas and carbon offsets

Partnering with customers to reduce their emissions

Set a customer 35% GHG reduction goal by 2050 from 2005

Growing CleanVision Natural Gas Balance program, the nation's first program to include both carbon offsets and RNG

DTE and its board believe the adoption of the shareholder proposal to revise its net zero target to include full Scope 3 value chain emissions would divert resources from our existing climate strategy and expose the Company to unnecessary legal risk to achieve a target without a clear path to accomplishing.
